DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by the Iwata et al reference (US Patent 5,999,022).

Iwata disclose in figure 2 and 3A a clock signal detection circuit comprising a first circuit 2 generating an output signal of predetermined potential in accordance with a first level of a clock signal, and setting an output terminal DO to a high impedance state in accordance with a second level of the clock signal; an impedance element 21 disposed between the output terminal of the first circuit and a potential source Vref having a potential that is different from the predetermined potential; and a second circuit 3 in figure 2 generating a clock signal detection (i.e., at its output terminal) result in accordance with an output potential of the first circuit as required by claim 1.

As to claim 3, element 21 is shown as a transistor as required by claim.

As to claim 5, the scope of claim is similar to that of claim 1. Therefore, it is rejected for the same reason set forth above.

As to claim 7, the scope of claim is similar to that of claim 3. Therefore, it is rejected for the same reason set forth above.

Allowable Subject Matter

3. Claims 2, 4, 6 and 8 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus comprising elements being configured as recited in claims. Specifically, none of the prior art teaches or fairly suggests, among other things, the limitation of "a third circuit" and "a fifth circuit" as required by claims 3 and 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
